# THINK DIFFERENT. THINK NAPOLEON.

Napoleon's 9600Q Series is one of the most stylish and efficient furnaces on the market. Napoleon is proud to launch the 9600Q Series gas furnace. Meeting new FER standards with flexfit installation options and 96% AFUE, it's the perfect choice for residential new construction projects.

The 9600Q Series uses the first, low-fire stage for greater efficiency throughout the heating season. During colder days, the furnace automatically switches to the high-fire, second stage to produce additional heat for your home. This effective two stage system is like having two furnaces in one. Napoleon's superior engineering and design guarantees consistent and comfortable temperatures throughout your home for many winters to come.

With the 9600Q Series furnace, you'll forget it's winter.

## That's Napoleon.

**Conventional Heat Exchanger**  
Hot air radiating 700°

Vortex™ turbulator inside the heat exchanger increases efficiency by disrupting the natural airflow which extracts the maximum heat from the flue gases.

Napoleon's heat exchangers are modular and removable to ensure easy servicing and cleaning.

**Patented Vortex™ Technology Heat Exchanger**  
Hot air radiating 800°

# SAVINGS & COMFORT

## ANNUAL FUEL UTILIZATION EFFICIENCY (AFUE)

AFUE works much like the miles-per-gallon rating on a car - the higher the rating, the lower the fuel costs. Higher Annual Fuel Utilization Efficiency means more comfort for every dollar spent. If a furnace is 25 years old or older, it could have a rating as low as 55% to 65% AFUE.

**96% + AFUE TRANSLATES INTO SIGNIFICANTLY LOWER FUEL BILLS**
