GAS FIREPLACE INSERTS

Heat Exchanger

A new and improved heat exchanger design for increased efficiency.

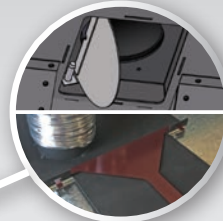

Hidden Pilot

Pilot placement has been optimized for a more authentic flame presentation.

Flue Adjustments

Flue restrictor can be adjusted externally during operation. Flue Plate re-designed for quick release & easy mounting.

150 CFM Fan

A 150 CFM convection blower with a run-quiet system pushes heat into the room.

New Log Set

A magnificent burn with an ultra high definition ceramic log set with a full flame.

Formed Burner

A stainless steel pan style burner design for improved flame presentation.

Venturi Slider

Venturi slider relocated towards the front of the unit for easier access.

BluQ Technology

The environmentally friendly control system that consumes less gas and maximizes efficiencies.

Ember Bed Lighting

Illuminate the bottom of your ember bed with the adjustable Ember Lights.

IFC/Battery/Valve

IFC, battery clip, and valve have all been relocated for easier access.
