Power Vent Kit

- A minimum venting run of 10 feet
- A maximum venting run of 110 feet
- Max of 6 elbows in vent configuration
- Venting can run downward 4' below the unit
- Flush mount (paintable) termination
- Run Quiet Fan System (noise reduction)

Cool Surface System HDK

In the past, wall mounted televisions or treasured decor pieces would degrade over time from the excess rising heat produced by your gas fireplace. Our new Cool Surface System for the C Series allows you to make use of the valuable real estate directly above your linear gas fireplace. It can channel heat inside the wall and vent it out above the fireplace.

(Included with the C60 Tall)

SIDE VENT (L&R) | Part: #50-3455

Side vent configuration allows heat to be vented to the left and right

These side ducts can be installed in a horizontal or vertical format and high temp paint (250ºF) can be used on the opening bezels to blend with wall color

FRONT VENT (FLUSH)
C34: #50-4128   C44: #50-4129
C60 #50-4130   C72 #50-4131

High temp paint (250ºF) can be used on the opening bezel to blend with wall color

Dual vents reduce surface temperature and evenly channel rising heat
